

# #1 Cost-Effective **Database/Application Backup** for Businesses and MSPs

## Backup from Any Location

VMs, Servers, Endpoints, Cloud VMs, SaaS, DBs/Applications, NAS/File Share

## Store Backup Anywhere

On-Premise/Remote Storage, Your Own Public Cloud, BDRCloud

## Centralized Management

BDRCloud-Hosted (or) BDRSuite's Self Hosted Management Console

## BDRSuite for Database/Application Backup & Recovery

BDRSuite provides backup and recovery solutions for databases and applications, ensuring data integrity and availability. BDRSuite supports database-level backup for SQL Server, MySQL, PostgreSQL, as well as application-level backup for Exchange and SharePoint. BDRSuite addresses challenges such as data loss, minimizing downtime and ensuring data integrity, making it ideal for MSPs and businesses.

## Key Features

### Database/Application level Backup

Securely backup only the critical databases and applications, ensuring data integrity and facilitating quick recovery to minimize downtime.

### Image-level Backup

Perform disk-image backup of the machine in which the application/database is running for complete system recovery in the event of a failure.

## Direct-to-Cloud Backups

### BDRCloud

Utilize our reliable & secure BDRCloud Storage

BDRCloud on Wasabi | BDRCloud on Amazon S3

### Bring Your Own Cloud

Use your existing Private/Public Cloud Storage

Amazon S3 | Azure Blob | Google Cloud | Wasabi  
Backblaze | MinIO | Other S3 Compatible Storage

### SQL Server Backup & Recovery

Backup and quickly restore your SQL Server databases, ensuring that all tables, procedures, and configurations are available and easily recoverable to prevent data loss and downtime.

### MySQL Backup & Recovery

Efficiently backup and recover MySQL databases, safeguarding all schemas, tables, and stored procedures, providing reliable data protection and minimizing application downtime.

## PostgreSQL Backup & Recovery

Securely backup and restore PostgreSQL databases, ensuring the safety and integrity of all database objects, including tables, indexes, and functions, with quick recovery options.

## Microsoft Exchange Server Backup & Recovery

Comprehensive backup for Microsoft Exchange Server, ensuring the protection of critical email data. This allows for quick restoration of mailboxes, emails, tasks, and other data.

## SharePoint Server Backup & Recovery

Backup your SharePoint Server data, enabling quick restoration of sites, documents, lists, libraries, and configurations to maintain seamless collaboration and productivity.

## Flexible Backup Storage

Supports backup storage across multiple tiers, including onsite/remote storage, BDRCloud, Private/Public cloud, providing flexible options for data protection.

## Incremental Backup

Captures only the changes made since the previous backup, which significantly reduces backup time and storage usage.

## Granular Restore

Enables the recovery of specific items such as individual database tables, emails, or files, facilitating precise and efficient restoration without needing a full restore.

## Version and Time-Based Retention

Manages multiple versions of backup data and implements time-based retention policies to meet regulatory requirements and storage management.

## Data Encryption

BDRSuite uses dual-layer encryption approach which provides robust security, protecting data as it moves across networks and when stored on backup media.

## Highly Rated

Backup Solution by Customers,  
MSPs, Channel Partners

“

We use BDRSuite for backup purposes and provide backup as a service to our customers. My company has been able to create a good income with a relatively small investment in BDRSuite. The flexible hybrid solution that BDRSuite provides along with reasonable pricing made us decide for this product instead of its competitors.

## What Makes BDRSuite

### Stand Out from Other Backup Solutions

- Cost-Effectiveness – Significant savings compared to competitors
- 24/7 Responsive Technical Support
- Ease of Use and Management with minimal learning curve
- Quick Setup and deployment
- No edition complexities. One edition for all backup needs

## Backup Simplified with

### Zero Hardware Investment

- BDRCloud-hosted Centralized Management Console
- Fully Managed in BDRCloud
- No Hardware Investment Required
- Cut Local Infrastructure Costs
- Quick and Simple Setup
- Automatic Upgrades & Maintenance
- Accessible From Anywhere, Anytime
- Scalable for Any Client Size
- Use Built-in Secure BDRCloud Storage or Bring Your Own Cloud

## Centralized Management

Self-hosted management console for overseeing and controlling backup operations across all databases and applications.

## Reports & Notifications

BDRSuite generates comprehensive reports detailing backup and recovery statuses with email alerts, providing valuable insights into the health of your backup environment.
