

Backup for Applications

With Vembu Backup for Application, you can backup Microsoft Exchange, SQL Server, SharePoint, SystemState, and MySQL without backing up the complete machine. You can backup the entire application data or only the selected databases. Vembu offers near Continuous Data Protection with incremental backups and flexible retention policies to retain backup versions for years. Vembu also offers inbuilt encryption & compression on flight and at rest

Customer Quotes

"The Vembu solution has increased Lentner Technology Integrator's bottom line for cloud backup services from \$1 per GB up to \$7 per GB. This has proved to be one of the most profitable services in our lineup offered to clients. In total, Vembu BDR has saved our clients an estimated half a million dollars in lost revenue from data loss last year."

**- Sean Lentner, CIO,
Lentner Technology Integrators**

Vembu Portal

It is an all-in-one portal to register & manage Vembu Products & Services with the options like:

- Billing
- Invoice
- Licensing
- Account Management

Key Features

MS Exchange Backup: Backup the entire MS Exchange Server or perform a folder-level backup of the mailbox by specifying the user.

MS SQL Backup: Backup your MS SQL server databases and restore the required databases by specifying the recovery state.

MS SharePoint Backup: Backup the site collections from your local machine in MS SharePoint by configuring an incremental backup schedule.

MS Outlook Backup: Backup your emails configured in MS Outlook profile along with the rules, at the folder level.

MySQL Backup: Perform incremental backups of your MySQL databases using utility tools to dump the data locally before transferring it to backup storage.

Interruption-free backup: The software intelligently picks the backup exactly from where it left off at times of interruptions so you don't have to start all over again.

In-built Compression & Encryption: The backup data is compressed and encrypted (AES-256 algorithm) on flight and at rest.

Restore to application server: Restore backups of MS Exchange, SQL, or Outlook data directly to the respective Microsoft application or into a local disk.

Getting Started

Download Vembu BDR Suite and Start the 30 days free trial version. After the trial period, you can either opt to purchase the product or continue using the free edition.
