

Simplifying Data Protection

Backup your business data to Vembu Cloud

Vembu offers secure, scalable cloud backup solution for SMBs. With Vembu OnlineBackup, businesses can protect their critical data on File Servers, MS-Application Servers and Endpoints. Also, it provides the flexibility to access and restore the backup files on cloud from anywhere at anytime.

Improved Scalability

Faster Restores

Better Management

Customer Quotes

"Backups used to account for 1 hour per month of time multiplied by the number of client sites. Vembu OnlineBackup reduces that time significantly by allowing a view of all successful client backups from the dashboard. As a result, only 15 minutes a month is now spent dealing with backups leading to savings of up to 95%"

- Scott Gallupe, CEO & Founder,
403tech, Inc

Supported Environments

Microsoft Infrastructure

- Microsoft Windows Server 2008 & above
- Microsoft Windows SBS 2003, 2008 & 2011
- Microsoft Windows 7 & above

Linux Infrastructure

- Red Hat Enterprise Linux 5 and later
- SUSE Linux Enterprise Server 12 SP3
- Debian Linux 5.0 and later

Features of Vembu OnlineBackup

Files/Folders Backup: Backup individual files and folders of Windows, Linux and Mac machines hosted in Physical/Virtual IT environment. There are no restrictions on the size and type of the files/folders that are planned for backup, you can even backup the open files

Individual MS-Applications Backup: Vembu supports Application-level backup to Cloud. Backups for Applications such as Microsoft Exchange, Outlook, Sharepoint, SQL, and MySQL can be individually configured and their data can be stored online

Backup Network Drives: Map the network drives through Vembu OnlineBackup client and backup all the files & folders directly to Vembu Cloud

Incremental Backup: After the initial full backup, only the changes made to the files/apps are backed up to Vembu cloud

Registry Backup: Using VSS technology, Vembu supports backup of Windows Registry settings including the user profiles to Vembu Cloud.

System State Backup: Backup the system state that includes critical system related components including Boot files, COM+ Class Registration database, Active Directory directory service, Certificate Service database, SYSVOL directory

Scheduling options: Vembu offers Continuous Data Protection for the files/folders that are configured for backup and also provides multiple scheduling options starting from Minutes to Hourly/Daily/Weekly

Flexible Retention policies: Retain any number of file versions with Version-based and Time based retention options

Pre/Post Commands: Add pre/post backup commands to run custom actions before/after the backup schedules

Restore Anywhere & Anytime: Login to the Vembu OnlineBackup web console from anywhere at anytime to instantly restore the backed up files/folders/applications from Vembu Cloud

- CentOS 5.2 and later Fedora 11 and later
- Ubuntu 10.04 and later

Mac Infrastructure

- 10.5.x (Leopard)
- 10.6.x (SnowLeopard)
- 10.7 (Lion) for Intel PCs & above

Vembu Portal

It is an all-in-one portal to register & manage Vembu Products & Services with the options like:

- Billing
- Invoice
- Licensing
- Account Management
- Account Management

Also, you can allocate, manage and purchase Cloud Storage from this single web console.

Complying Laws: Vembu OnlineBackup is designed in a way to help the organizations to meet the compliance requirements of local laws

Compression & Encryption: The backup data is compressed and encrypted (AES-256 algorithm) on flight and at rest

Bandwidth Throttling: This feature allows you to throttle the speed of the backup data transfer for the selected time, and helps in reducing the network traffic during peak time

Backup Schedule Window: Set the time frame to stop running your backup jobs for a certain time period. Once the schedule window limit ends, every backup job will be resumed automatically

E-Mail Notification: Enable email notifications to get alerts about the status of the configured backups (like success, failure, missed, etc)

Getting Started

Signup for Vembu OnlineBackup and start the 30 days free trial version with 10GB free cloud storage. After the trial period, you can purchase the license and cloud storage to continue using the product.
