

#1 Cost-Effective VMware Backup for Businesses and MSPs

Backup from Any Location

VMs, Servers, Endpoints, Cloud VMs, SaaS, DBs/Applications, NAS/File Share

Store Backup Anywhere

On-Premise/Remote Storage, Your Own Public Cloud, BDRCloud

Centralized Management

BDRCloud-Hosted (or) BDRSuite's Self Hosted Management Console

BDRSuite for VMware Backup & Replication

BDRSuite offers a comprehensive and cost-effective solution for backup, replication, and disaster recovery for VMware environments (ESXi & vCenter). By simplifying and automating data protection, BDRSuite helps businesses and MSPs tackle challenges such as data loss, downtime, data integrity, and recovery complexities.

Supported Platforms

VMware vSphere 5. X & above

Key Features

Agentless VM Backup

Backup VMware VMs on ESXi & vCenter, without installing any agent inside each VM. Supports VMware vVols and vSAN and different transport modes - Hot-Add, SAN, NBD.

Flexible Recovery

Restore the backed up VMware VMs the way you need it, such as an entire VM, specific disks, individual files/folders, or application-items.

Centralized Management Console

BDRSuite offers real-time visibility and control over your backup environment through a self-hosted centralized management console deployed in your preferred environment.

Direct-to-Cloud Backups

BDRCloud

Utilize our reliable & secure BDRCloud Storage
BDRCloud on Wasabi | BDRCloud on Amazon S3

Bring Your Own Cloud

Use your existing Private/Public Cloud Storage
Amazon S3 | Azure Blob | Google Cloud | Wasabi
Backblaze | MinIO | Other S3 Compatible Storage

Agentless VM Replication

Replicate VMware VMs to a different network or site and enable VM failover and fallback to ensure seamless business continuity.

Store Backup Anywhere

Store backup data in NAS, DAS, SAN, BDRCloud, Amazon S3, Azure Blob, Google Cloud, Wasabi, Backblaze B2, MinIO, etc.

Ransomware Protection & Recovery

Protect your backups from ransomware threats with immutable backups and quickly restore data to mitigate the impact of ransomware attacks.

CBT-based Incremental Backup

VMware Changed Block Tracking (CBT) is utilized to track and backup only the changes since the last backup.

Customizable Backup Scheduling

Set up automatic backups at intervals such as every 15 mins, hourly, daily, weekly, monthly, automating data protection.

VMware Disaster Recovery

Create multiple backup copies and store on different storage targets & locations like remote/offsite data center or BDRCloud or Tape Drives.

Advanced Backup Settings

BDRSuite enables to configure application-consistent backup, log truncation, automated backup verification, simplify backup job creation with predefined job templates & more.

Data Retention & Compliance

Manage data retention with options to keep backups for days, weeks, months, or years while adhering to compliance standards like HIPAA, GDPR, and SOC 2.

Backup Encryption & Compression

Built-in encryption and compression both during transfer and at rest. Custom password protection provides an extra layer of security, protecting data from unauthorized access.

Remote Backup

Enable backups of VMs from any network or geographic location, providing flexibility for distributed environments and remote operations.

Highly Rated
Backup Solution by Customers,
MSPs, Channel Partners

“

We use BDRSuite for backup purposes and provide backup as a service to our customers. My company has been able to create a good income with a relatively small investment in BDRSuite. The flexible hybrid solution that BDRSuite provides along with reasonable pricing made us decide for this product instead of its competitors.

What Makes BDRSuite

Stand Out from Other Backup Solutions

- › Cost-Effectiveness – Significant savings compared to competitors
- › 24/7 Responsive Technical Support
- › Ease of Use and Management with minimal learning curve
- › Quick Setup and deployment
- › No edition complexities. One edition for all backup needs

Backup Simplified with Zero Hardware Investment

- › BDRCloud-hosted Centralized Management Console
- › Fully Managed in BDRCloud
- › No Hardware Investment Required
- › Cut Local Infrastructure Costs
- › Quick and Simple Setup
- › Automatic Upgrades & Maintenance
- › Accessible From Anywhere, Anytime
- › Scalable for Any Client Size
- › Use Built-in Secure BDRCloud Storage or Bring Your Own Cloud

Reports & Notification

Detailed reports (Job or VM Level) and instant email notifications keeps you updated on each task status (Backup, Recovery, Replication, Offsite Copy etc)
