Steps to Install BDRSuite Client for Files & Applications (VembuNetworkBackup) Mac (Intel-based, 64-bit) [Silent Installation]

Steps to Install BDRSuite Client for Files & Applications (VembuNetworkBackup) - Mac (Intel-based, 64-bit) [Silent Installation]

1. Download the VembuNetworkBackup installer zip file for Mac (Intel-based, 64-bit) from the provided link.
2. Unzip the zip file.
3. Change directory by using cd command to VembuNetworkBackup_IMac_Client_Only which consists the executable file.
4. Enter the below command for silent Installation.

Silent Installation Command (Fresh Installation):

sudo sh VembuNetworkBackup_IMac_Client_Only.bin 2 Password123$ /Applications 2 admin admin admin 4040 0 imac1 /Applications 32004 31005 Customer 0

The attributes of the command represents the following:

VembuNetworkBackup_IMac_Client_Only.bin → generated bin file

2 → Installation Type [Service=2 / Application=1]

Password123$ → Password of the mac OS machine

/Applications → InstallationDirectory

2 → Agent Type (Server Only = 1 , Client Only = 2)

admin → UserName

admin → AccountPassword

admin → AccountReTypePassword

4040 → Port

0 →Type (Fresh = 0 , Upgrade = 1)

macmini → ClientIdentity [client id]

/Applications → InstallationDirectory

32004 → BackupServerPort

31005 → CommunicationPort

Customer → ClientCustomerName

0 → IsHttpsEnabled

Then the product will be installed at /Applications/Vembu/VembuNetworkBackup.

Note: We only support fresh installation for Intel Mac OS. Upgradation is not supported.

On Top Installation :

Same build can be installed on top of it (V4.2.0 Intel Mac → V4.2.0 Intel Mac client build)

The command for on top installation is given below:

sudo sh VembuNetworkBackup_IMac_Client_Only.bin 2 Password123$ /Applications 2 admin admin admin 4040 **1** imac1 /Applications 32004 31005 Customer 0

The difference between the commands is the argument passed:

0 → Fresh install
1 → **Upgrade / On top installation**
