Vembu SaaSBackup 1.5- Release

Introduction

Vembu SaaSBackup 1.5 is now available for production usage and so, start protecting your Office 365 and Google Apps data with Vembu SaaSBackup 1.5. With the new features and latest fixes, Vembu SaaSBackup 1.5 will provide you reliable backup and multiple recovery options for your Office 365 and Google Apps (now G Suite) data.

Office 365:

Vembu SaaSBackup backs up the entire organization's Office 365 accounts or any individual user accounts. It backs up Mails, Contacts, Calendar and OneDrive for business data to Vembu Cloud.

- Backup entire domain or individual users
- Supports OneDrive for business data backup (Tenant Admin)
- Supports restoring emails and documents to same or different user accounts
- Download backed up documents from SaaSBackup portal
- View backed up emails from SaaSBackup portal
- Search backed up user accounts from SaaSBackup portal and lot more

Google Apps (now G Suite):

Backs up Google Apps (G Suite) admin account which includes all users' Gmail, Drive, Contacts and Calendar. Also, Vembu SaaSBackup supports backing up individual user accounts.

- Backup entire domain or individual users
- Supports restoring emails and documents to same or different user accounts
- Download backed up documents from SaaSBackup portal
- View backed up emails from SaaSBackup portal
- Search backed up user accounts from SaaSBackup portal and lot more

Feature Highlights

- **Automated Incremental Scheduling -** As per incremental scheduling configuration, the backup of Office 365 and Google Apps will be automatically triggered daily

© Vembu Technologies

Vembu SaaSBackup 1.5 - Release

- **Secured Backup -** We are using AES 256 bit algorithm to encrypt the backup data which is transferred over WAN and also at rest

- **Single Click Document Download -** If you want to instantly restore the backed up Google Drive or OneDrive documents, you can use download option available in SaaSBackup portal. It will download the document without restoring it to the original user accounts

- **Mail level restore -** The mail level restore helps you to restore your deleted or old employee's email to same or any other user accounts

- **Mail View -** Vembu SaaSBackup provides option to view your backed up mails from SaaSBackup portal. So you don't need to restore the mail, just click the mail to view the mail content

- **Agentless Backup -** Since Vembu SaaSBackup uses authorized APIs to backup Google Apps and Office 365 accounts, agent installation is not required to backup these accounts

Enhancements

- **Quick Search -** Vembu SaaSBackup provides the option for searching any particular items while backing up and restoring the mail, document and contacts

- **Enhanced report and logging -** The detailed reports available in the report page, give you a clear idea about overall backup status in a single page

- **Live backup progress -** The live backup progress window lets you view the current backup status with the live backup window

Known Issues and Limitations

- The calendar data can only be restored with same account. Due to API restriction, cross user restore is not allowed

Vembu SaaSBackup 1.5 - Release

- The calendar edit is not supported with the current version. However, we will fix the said issue with upcoming release

- Currently we are not offering the own cloud deployment with your infrastructure, but we have added in road map and it should be available after one or two major releases

  OneDrive for business backup only supports Tenant admin user, Due to API restriction, all user level document backup is not supported by Admin auth token. As per Microsoft
- direction the new user level OneDrive access API will be available on 1st quarter of 2017
