BDRSuite

Product Overview

BDRSuite

BDRSuite is a portfolio of products designed to backup multiple environments from virtual to physical to cloud while addressing diverse and advanced use cases

Virtual

VMware

Hyper-V

Server

Windows

Linux

Apps & DB

Exchange

SQL

SharePoint

MySQL

Endpoint

Windows

Mac

SaaS

Microsoft 365

Google
Workspace

Cloud

AWS

What's new in BDRSuite v5.3

BDRSuite v5.3

New Features

New Features in BDRSuite v5.3

File Server Backup

from Backup Server UI

You can now add Windows and Linux file servers to the Data Source and configure file & folder level backup from the BDRSuite Backup Server console.

Endpoint Backup

from Backup Server UI

Now, you can configure File & Folder Backup of multiple Windows & Linux Endpoints directly from the BDRSuite Backup Server console.

Azure Blob

as Backup Repository

Primary backup data and backup copy data can now be stored in Azure Blob storage directly.

Active Directory

Integration

BDRSuite Server now integrates with Active Directory for user management. You can import and add AD/LDAP users to the BDRSuite Backup Server and grant them different levels of access.

Integrity Check

on VMware ESXi Server

You can now run the automated boot test on VMware ESXi hosts to confirm the recoverability of the backup machines.

BDRSuite v5.3

Enhancements
