How to protect your business from data loss?

Data loss & its Sources

Threats

Malware attacks

Human errors

Data corruption

39% of the global data breaches caused by malware were ransomware

58% of downtime incidents are caused by human error alone

50% of hard drives fail every five years

Natural disasters

Causes of Data Loss

94% of companies suffering from a catastrophic data loss do not survive – 43% never reopen and 51% close within two years.

7 out of 10 small firms that experience a major data loss go out of business within a year.

An hour of disruption can cost a small company \$8,000, a medium company \$74,000, and larger enterprises roughly \$700,000.
