Backup & Disaster Recovery

**10+ Years**

**100+ Countries**

**60,000+ Businesses**

# Vembu Technology Partner

# Vembu Customers

# Vembu BDR Suite

---

*Vembu BDR Suite is a portfolio of products designed to backup multiple environments from virtual to physical to cloud while addressing diverse and advanced use cases*

**Backup & Replication for VMware**

**Backup & Replication for Microsoft Hyper-V**

**Backup for Microsoft Windows**

**Backup for File & Application**

**Backup for Microsoft 365**

**Backup for Google Workspace**

**Backup for AWS**

## **Add-ons**

---

**Vembu Offsite DR**

**Vembu Cloud DR**

# Vembu Cloud BDR Suite

*Comprehensive, Secure, and Cost-Effective Cloud Backup Solution for SMBs*

**Cloud Backup for File & Application**

**Cloud Backup for Microsoft 365**

**Cloud Backup & Replication for VMware**  
*(coming soon)*

**Cloud Backup for Microsoft Windows**  
*(coming soon)*

**Cloud Backup for AWS (5.0)**

**Cloud Backup for Google Workspace (5.0)**

**Cloud Backup & Replication for Microsoft Hyper-V**  
*(coming soon)*

What's new in  
**Vembu Backup for Microsoft Windows v5.0**

# New Features in v5.0

## Multi-host Backup

Create a backup job with multiple-hosts and configure to run parallel thus improving backup performance.

## Synthetic Full Backup

Synthetic full backups are created in the backup repository by merging the full backup and all subsequent incremental backups in the backup repository itself

## Applications item-level Recovery

Granularly restore Microsoft applications at item level directly from the BDR Backup Server web GUI

## Instant Boot Live Migration

A permanent migration process where the virtual/physical machine backup that is instantly booted as VM can be migrated as an independent VM to a targeted VMware Host.

# New Features in v5.0

## Where it left off

*Even if there is a network failure or other interruptions during backup, the backup will automatically restart from where it left off during the previous schedule*

## Drive Rotation

*It helps you to use multiple external hard drives to store the backup data and swap them on a regular basis.*

## GFS Retention

*GFS retention helps to create restore points on a weekly, monthly, quarterly, and yearly basis.*

## Backup Job Template

*The frequently used backup configuration settings or as per some predefined backup policies, you can utilize these templates to create new backup jobs quickly.*

# Vembu BDR Suite v5.0

## Enhancements

- *Can initiate restore when backup is in progress*
- *Backup Job & Offsite copy can run parallely*
- *Enhanced UI/UX for backup job configuration*
- *BMR using Vembu Recovery CD*
- *Backup Window settings at backup job level*
- *Backup-Throttling support for backups*
- *File-Level recovery support for dynamic disk backups*
- *Disable compression & encryption of backup data*

# Vembu BDR Suite v5.0
